A citizen of Benton Harbor who has nade the subject of fires a study has prepared for THE NEWS the following imely paper:

When the prevention of fire is considered to first thing to suggest itself is eternal vigilance on the part of property owners. This vigilance should begin with the foundation stone of new buildings and should be rigidly exercised to their completion. Defective fires while some kinds of roofing serves as a capital firetrap.

What I believe to be one of the prolific causes of fire is fire insurance. There is always a temptation to a dishonest person whose policy is close enough to the actual value mark to realize on it by a first class conflagration. While insurance companies exercise precaution it is to be feared that they are often victimized, and that too by persons whose wealth and social postion place them beyond the pale of sus-Insurance companies should take an

The controlment and extinguishment of a fire in its early stages is often equivalent to saving large sums of money to the insurance companies, and it is but fair to assume that they should take a vital interest in the maintenance and equipment of a first class organization.

In a city like Benton Harbor or St. Joseph of some 6,000 or 7,000 inhabitants a fire arouses much excitement and the sound of the fire alarm is usually accompanied by the sound of rushing feet as hundreds of people orted to have been made in San Fran-hurry to the scene. It is usually a time subdue the flames and preserve property, and while it brings men of this character to the front, it more frequently proves that many persons, who under ordinary circumstances are level headed under the stress of excitement seem to loss their reasoning faculties. He left the city and moved to St. Joseph at 10 o'clock one night. True, his property was mortigaged as reported but the change was entirely satisfactory to the Buchanan man who held the mortgage, John Weisgerber. It was with Mr. Weisgerber's consent that the mortgaged property was moved from Buchanan to Benton Harbor and the only fault to be found with Mr. Campbell in the transaction is that poor business made it impossible for lim to keep all his contracts with his creditors.

When Colonel Knox of the Duke of Cornwall's light infantry acquainted the queen with the fact that Mrs. Ke-veth of Garrow, St. Bernard, Cornwall, veth of Garrow, St. Bernard, Cornwall, was the mother of seven sons, all in the army, her majesty caused the following letter to be written to Colonel Knox: "Her majesty considers that the fact of seven sons of one family serving in the army, all with exemplary characters, reflects infinite credit on themselves and on the parents who have brought them up. The queen desires that you will congratulate Mrs. Keveth, give her the £10 and framed print of her majesty, which I send herewith, and tell her how glad the queen is to think of this fine example of good and horostable service to their sovereign and country from the example of good and honorable service to their sovereign and country from the sens of a single Cornish family. Her majesty has kept the photograph of Mrs. Koveth which you sent me and would be glad to have one of the seven brothers in a group, but if this cannot be obtained, of each separately," The photographs have been framed together in an oval frame, that of Mrs. Koveth being in the middle, and sent to the queen.—London Graphic.

Unpublished Calls Lettera A kineman of John C. Calhom, who has recently visited the old homestead nas recently visited the old homestead in South Caroline, says he found there nearly 3,000 unpublished letters of the South Carolina statesmen. He quotes one written to Mra Clemson, his daugh-ter, March 7, 1848, she being in Belgium at the time in which Calhoun wrote:
"I held the duties of life to be greater "I hold the duties of life to be greater than life itself, and in performing them manfully and against hope our labor is not lost, but will be productive of good in after time. Indeed, I regard this life very much as a struggle against ovil and that to him who acts on proper principle the reward is in the struggle more than in the victory itself, although that greatly enhances it. So strong is that greatly enhances it. So strong is my fuith in this belief, my dear daugh-ter, that no appreciation either by the present or after time is necessary to sus-tain me in struggling to do my duty in resisting wrong, especially where my country is concerned, although I put high value on renown."

Porcupine Doesn't Threw His Quills. The spines are very loosely attached to the percupine, and they are very sharp—as sharp as a needle at the outer end. At almost the slightest touch the penetrate the ness of a dog or the clothing or flesh of a person touching the percupine and stick there, coming away from the animal without any pull bein required. The facility in catching hold with one end and letting go with the other has sometimes caused people to think that the spines had been thrown at them. The outer end of the spines for some distance down, is covered with small barbs. These barbs cause a spine once imbedded in a living animal to keep working farther in with every movement of the muscles, so that it is not a pleasant toing to get stuck full of them.—Portland Oregonian.
